

# EQUIPMENT MONITORING

American MTS has the test equipment needed for onsite diagnostic and periodic testing including:

- ✓ PdMA MCEMax Static/Dynamic Fault Test System
- ✓ Commtest Vibration Analyzer
- ✓ Flir Infrared System
- ✓ SDT Ultrasonic Analyzer
- ✓ Baker Advanced Winding Analyzer
- ✓ EZ Laser Alignment System

We also offer continuous monitoring options including:

- ✓ i-Alert2 Vibration and Temperature Monitoring System
- ✓ Realtime Asset Monitoring System (RAMS®)

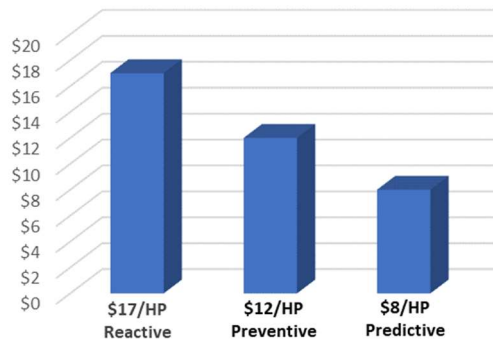

## Your equipment will fail – do you know when?

Your plant depends on equipment being available when needed. Unfortunately from the day first installed it is starting to fail. Not knowing when can be both stressful and costly. Implementing a predictive maintenance program will give you the data needed to catch things at early stages of failure.

ASME Study Of Maintenance Costs

It is one of the ways American MTS is focused on increasing your plant's reliability. We understand the impact of costly unplanned down time. We have the products, services and training to help you avoid it.

American MTS has the tools and know how to help you get started or improve on your proactive maintenance system. We offer periodic programs as well as continuous devices to help customize a predictive system ideally suited to your needs and budget.

Contact us today for a free evaluation of your plants critical equipment. See how we can help save you time, money and stress by monitoring your equipment health.
